

## WATER RESOURCES MASTER PLANNING

We help clients develop strategic solutions to bring water to their projects

We are skilled  
in navigating Arizona's  
complex water resource  
regulatory process.

### EXPERTISE

Our water resources team understands the complexity of Arizona water law/policy and its impact on our client's future. We explore water resources available to clients and develop ways to leverage those resources to benefit their project, constituents, or customers. We find water resources and also permit, plan and design the infrastructure to best deliver the water.

## SERVICES WE OFFER

- Water resource master planning
- Water rights and water source portfolio review
- Full infrastructure master planning for water, wastewater, and reclaimed systems
- Capital and operational expenditures analysis for water resources and infrastructure planning
- Assured and adequate water supply permitting with the Arizona Department of Water Resources
- 208 Plan Amendments
- Hydraulic modeling of water and wastewater systems
